

Science

Years 5 and 6

During Term 1 students in Years 5/6 will be focussing on 'Biological Sciences'. They will be exploring how the growth and survival of living things are affected by the physical conditions of their environment.

Throughout Term 1 students will have opportunities to conduct simple experiments to observe the effects of different variable on growing seeds and bacteria in controlled environments.

Students will pose questions and wonderings then design investigations to answer their questions, solve problems and demonstrate their new understandings.
